Subject: Microsoft Settlement

To: United States Department of Justice
From: Lawrence Day, 1539 W. George St. Chicago, IL 60657

As a concerned citizen, I strongly recommend everyone involved in the Microsoft case, to put an end to the lawsuit by accepting the proposed settlement. It will do so much for all communities, especially those who need it most. I do not understand why these nine states, where other main software companies are located, continue their pursuit of Microsoft. The longer this goes on, the longer it will take to help the children the settlement is suppose to help. It will also save American tax dollars. Litigation is expensive!

Microsoft has done a lot for me personally. It has given me the ability to spend more time with my family by making it easier and faster to do the paperwork required at my job. It used to be so burdensome. Now by using Microsoft Office, I can automate some of it. I can't understand how myself and other consumers have been hurt by this company.

Please relay this information to the Judge and any other parties that can help.

Thank you very much.

Sincerely,

Lawrence Day
